JAKA®

Just Always Keep Amazing

Global Leader in Flexible Intelligent Robotics

PRODUCT SELECTION GUIDE

No Teaching Pendant

Programming JAKA collaborative robots is made easy with our JAKA APP, available for Android and Windows devices. Traditional teaching pendants are no longer necessary.

Wireless Connection

Say goodbye to messy wires! JAKA cobots can now communicate and receive task assignments via their own WiFi connection, leaving you with a clean and safe workspace.

Safe Human-robot Collaboration

JAKA cobots are designed to work safely alongside humans, without the need for a safety fence, thanks to their collision detection module. Even the slightest bump can be detected, allowing the cobot to react and avoid causing harm.

Graphic Programming

Our intuitive graphic programming software interface is designed for anyone to use, regardless of prior programming experience. Setting positions and tasks is a breeze with our user-friendly interface.

Drag Teaching

With our drag teaching function, users can deploy a cobot in just a few minutes. Simply move the cobot to any desired position, and it will instantly memorize it.

Plug-and-play

Install a JAKA cobot in just a few minutes, and mount it in any position or inclination. Our cobots are lightweight and are compatible with a wide range of grippers and end effectors. This makes them highly versatile and able to be deployed and re-deployed in any production environment.

JAKA Zu Collaborative Robots

Easy to Install

Plug-and-play
Simple deployment
Small footprint

Easy to Use

In-built torque feedback module
Drag teaching
Graphic programming

Precise

Excellent repeatability
Great precision
MTBF 50,000 hours

JAKA Lens 2D

JAKA Lens 2D

Product description

The JAKA Lens 2D camera is equipped with a high-resolution industrial camera, a light source module, and an optional camera lens to provide our collaborative robots with machine vision capabilities. Despite its small and delicate appearance, this camera is highly effective. It can be installed either in a fixed position or at the end of the cobot.

 Convenient <small>Compatible with any JAKA cobot</small>	 Customizable <small>Optional camera lens. Various functions are available.</small>	 Practical <small>The camera uses JAKA software, no need for additional licenses.</small>
---------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Product Features

Integrated design	Easy operation	Scenario-adaptable
<p>The 2D camera consists of three key components: a camera, a lens, and a light source. It is able to communicate with a JAKA robot control cabinet through the web, making it an easy-to-use and highly effective addition to our cobots.</p>	<p>Our control cabinet is embedded with intelligent vision algorithms. Additionally, it features flexible communication interfaces that are able to adapt to the robot body, ensuring that it is a highly versatile and adaptable tool.</p>	<p>Our 2D camera also supports third-party camera extensions and custom external light sources, making it highly versatile and adaptable to a wide range of application scenarios.</p>

Technical aspects

Parameters	Lens 2D CGC500-F08	Lens 2D CGC500-F16

JAKA Lens VPS

Product description

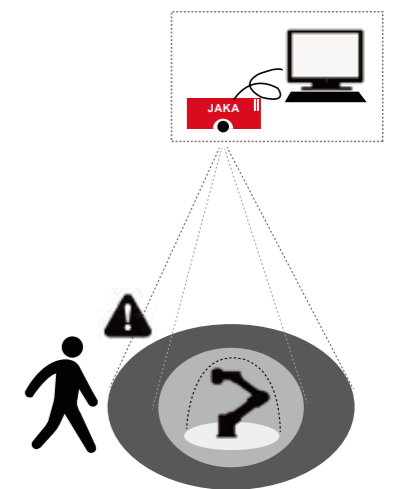

JAKA Lens VPS 2.0 is a cutting-edge technology that utilizes a high-performance AI-SoC chip, along with high-speed and large-capacity memory and storage. It is equipped with a high-performance acceleration engine, which can perform target detection, object recognition, human pose point extraction, and behavior understanding. The VPS is designed to be installed at the top of the cobot's working area, allowing the camera to monitor the behavior of inspected objects (both people and objects) in real time, ensuring the safety of both people and equipment. The camera also features a Gigabit Ethernet port, which supports data extraction and video visualization.

 High reliability <small>Isolate external factors. The protection effect is stable and reliable.</small>	 High performance <small>High speed combined with high storage capacity.</small>	 Convenient <small>No complicated software installation required. Simple to install.</small>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Product Features

- ⏸
Built-in neural network accelerator for AI recognition and analysis of video
- 📅
Event recording function, which can record key video segments, eliminate redundant information, trace back, and analyze more conveniently
- 🌐
Plug and play, no need to install software, access settings via browser
- 🧠
It can perform AI detection functions such as helmet wearing, personnel target tracking, personnel labor intensity, and video scoring calculation

Visual protection system working diagram

Basic parameters

Hardware platform	CMOS camera, embedded system, DSP, AI engine, etc.
Dimensions	101.7×72×51.1mm
Installation method	Directly above, sideways (any angle)
Communication interface	Ethernet interface, RS485, PNP optocoupler isolation DI and DO

Visual parameters

Resolution	8.3 MP
Response time	200 ms
Installation height	2.5 mm (suggested)
Coverage surface	5 m x 2.6 m (adjustable)

JAKA MiniCobo

Product introduction ▾

The JAKA MiniCobo is a small, rounded robot that is perfect for applications where appearance is important. Thanks to its built-in communication port, it doesn't require any external cables and can be easily connected to any tool that is compatible with JAKA. Additionally, JAKA's MiniCobo incorporates intelligent control algorithms, giving it a superior performance compared to its competitors. The MiniCobo operates quietly, making it an ideal solution for a range of industries including hospitality, education, retail, services, and entertainment, among others.

Ideal for B2C

		1 Analog input	
	Tool I/O power	24VDC	
	Tool I/O size	M8	
	Materials	Aluminum, PC	
	Base diameter	124mm	
	Cable length	6m	
MiniCab cabinet	Power input	20-60VDC	
	Current	0-11.67A	
	Size	180×128×47 mm (L×W×H)	
	IP Protection	IP20	
	I/O	7 Digital input: I/O configurable	
	I/O Power	24VDC	
	Installation	Panel/Guide Rail	
	Communication	TCP/IP, Modbus TCP, Modbus RTU, Profinet, Ethernet/IP	
	Weight	1.1kg	
	Material	Aluminum, Steel
